

**Supplementary Table 1. Extrahepatic disease at time of ablation**

	Frequency
None	233
Lung	24
Lymph nodes	7
Abdominal wall/seeding	5
Peritoneal carcinomatosis	3
Lymph nodes and lung	2
Lung and peritoneal carcinomatosis	1
Retroperitoneum and lymph nodes	1
Bones and lymph nodes	1
Ovaries and bone	1
Bones	1
Uterus	1
Ovaries	1
Adrenal gland	1

**Supplementary Table 2. Other cancers at time of ablation**

	Frequency
Cancer prostata	7
Cancer mamma	6
Cancer ovarii	2
Cancer pulmonis	2
Lymphoma	1
Malignant melanoma	1
Chronic lymphocytic leukemia	1
Basal cell carcinoma	1
Squamous cell carcinoma	1
Cancer glottis	1
Chronic myelogenous leukemia	1
Cancer parotis	1

**Supplementary Table 3. Complications following ablation**

Complication(s)	No.
None	203
Postablation syndrome	22
Bleeding	6
Liver abscess	4
Pleural effusion	4
Bile duct leak	1
Thermal damage to adjacent structures (diaphragma, duodenum)	2
Painful respiration	1
Localized abdominal pain	9
Liver abscess and pleural effusion	1
Bile duct leak and liver abscess	4
Pleural effusion, atelectasis, and fever	1
Postablation syndrome and abscess	1
Fever and pleural effusion	2
Pneumonia	3
Abscess og and stricture of bile duct	1
Intrahepatic cholestasis	1
Fever and localized abdominal pain	4
Cutaneous burn and biliary fistula	1
Postablation syndrom and bile duct leak	1
Herpes zoster og fever	1
Syncope due to arrhythmia	1
Cutaneous burn	2
Thermal damage to adjacent structures (duodenum, aorta) and bleeding	1
Liver failure and bile duct leak	1
Liver abscess and liver failure	1
Postablation syndrome and liver abscess	1
Pleural effusion, atelectasis, fever, and subphrenic abscess	1
Missing	2
