

Supplementary Table 1. Association of EI ratio and plaque thickness with carotid IPN grade

	Total (n=369)	Carotid IPN		P-value
		Grade 0 and Grade 1 (n=236)	Grade 2 (n=133)	
EI ratio (%)	7.40±11.04	1.65±4.48	17.59±11.87	<0.001*
Plaque thickness (mm)	2.21±1.01	2.15±1.21	2.24±0.83	0.256

EI, enhanced intensity; IPN, intraplaque neovascularization; n, the number of patients.

*P<0.05.
